A Study on usage of Mobile Phone impacts on College Students attitudes and behaviours

S. Shahul Hameed

Abstract: The pace of the development of technology in world, get triggered greatly by the invention of mobile phones. In the earlier stages of this invention was to speak and share messages. Later it gradually enhanced its usage like listening to music, playing games etc. eventually; it included the whole world by the technology of internet. After the invention of mobile phones, most of the human activities become much easier especially communication. In the era of mobile phones, Distance is not at a matter. By dialing a person’s number, within a fraction of seconds, communication succeeds. It takes a great part in the success of any business. In spite of its vast benefits, many of the people feel that it may lead to degeneration of younger society.
