AutoLib is a popular Library Management Software being used by 500 reputed institutions in India and abroad such as Universities, Engineering, Arts & Science, Management, Medical and Agriculture Colleges, Business Schools, Multinational Software companies, etc. in India and abroad since 1998.

You are one of our valued customers using old version of our software for many years. The old software will not work in Windows 7 and other higher versions since Microsoft stopped support to Visual Basic and few other technologies in their recent Operating Systems. Moreover old Windows OS such as XP and Windows 2000 server cannot be installed in the new computers. Therefore, we are not able to provide full technical support to the old version of the software you are using.

Hence, we have designed and developed entirely new web based software using java technologies and MySQL. This software is available in several editions.

Most of our clients already purchased the new software. We have informed to our clients in 2015 itself.

The new software incorporated most of the features of the earlier AutoLib software besides many new additional features. The details are enclosed herewith.
