Solid Waste Management

The College focuses on processes and actions required to manage solid waste from its inception to its final disposal. This includes physical structures like incinerating and vermicomposting sites, technologies, economic mechanisms, disposal of waste and MoUs related to waste management processes. Dustbins are placed at every corridor, canteen and different locations on the campus. Under the supervision of the campus manager, sweepers are involved in collecting the waste generated on the campus. All waste/garbage collected by housekeeping personnel are segregated and incinerated weekly in the designated area away from the campus. Students and staff are educated on proper waste management practices through lectures, advertisement on notice boards, displaying slogan boards on the campus. The college also produces compost manure from the canteen solid waste and agricultural waste from the gardens. The two Ladies' Hostels have incinerators. There are two incineration pits on the campus, one next to the canteen and the other near the Girls canteen.
